Md.Imran Ahmed

Full Stack Web developer
Address:Rangpur, Bangladesh
Mobile: +8801724641694
Email: amdimran328@gmail.com
Github || Linkedin ||

Objective:
To secure a full stack position at a challenging and innovative company where I can utilize my skills in Tailwind, Bootstrap, JavaScript, React, Node.JS, API, Git, GitHub, and other full stack technologies to create engaging and user-friendly web applications.

Skills and Technologies:

- **Experties**: HTML || CSS || JavaScript || Tailwind || Bootstrap || React || Firebase || DaisyUI and more
- **Comfortable**: Node.js || React Router || Express.
- **Familiar**: Next.js, React Native
- **Tools**: ChatGPT || VS code || NPM || Chrome DEV Tools || React Developer Tools || Netlify || Vercel || Figma

Projects:

1. **Pre-Write**   **Client site link || Server site link || Live site link**
   - Users can add books for sale and view all the books that have been added. They can also update or delete books as needed.
   - The website is responsive, and all the generated data is seamlessly integrated with the backend.
   - Users can register, log in, view books, and see detailed information about each book.

   Technologies used: React js, MongoDB, Node.js, Express,Tailwind, DaisyUI, Firebase etc

2. **Sport Academies**   **Client site link || Server site link || Live site link**
   - Users can add classes, view all added classes, make payment and see more classes and instructors can delete classes.
   - Seamless user experience with an intuitive interface, fortified by robust Firebase authentication for utmost privacy and protection.
   - Administrators have access to a dedicated dashboard where they can manage users, modify user roles,and monitor class management.

   Technologies used: React js,React hook form,React Query, Swiper, Sweetalert, MongoDB, Node.js,

3. **Chief Recipe**   **Client site link || Server site link || Live site link**
   - Users can register, log in, view recipes, and see detailed information about each recipe.
   - The website is responsive, and all the generated data is seamlessly integrated with the backend.
   - Seamlessly complete transactions through secure payment processing.

Technologies used: React js, MongoDB, Node.js, Express, Vanilla CSS, Bootstrap, Firebase etc
